Project Title: Fleetwood Mac Website

I'd like to build a website that has multiple pages. There is tons of photography, and I would also like to include some music as well.

Home Page/Introduction: Introduce band. Maybe include a top 10 famous songs with music included

History: Include history of the group with images

Band Members/Bios: Include information about members of the band throughout it's history with photos

Album Art/Song List: Each album cover is a button that leads to a list of songs
